## Thermostatic

## Rada 425

Rada 425 Thermostatic Mixing Valve for institutional group fixture water temperature control. Compact design with top and/or bottom blended water outlet makes Rada 425 ideal for recessed enclosure, plumbing chase and utility/mechanical room installation.

Powerful internal mechanism and stainless steel operating mechanism resist mineral deposition.

Capable of close temperature control at diverse flow rates between $2 \mathrm{gpm}(7.5 \mathrm{lpm})$ and $49 \mathrm{gpm}(185 \mathrm{lpm})$. Able to blend to within $5^{\circ} \mathrm{F}\left(2^{\circ} \mathrm{C}\right)$ of either inlet supply due to "low seepage" across internal proportioning mechanism.

## Operational Specifications

- Dual thermostatic elements provide redundancy in the event of individual thermostat failure.
- Typical outlet temperature control $+/-2^{\circ} \mathrm{F}$
- Adjustable maximum temperature limit stop
- Adjustable single temperature lockout
- Thermal shutdown mode upon inlet supply failure

## Technical Specifications

- 1-1/4" NPT inlets and 1-1/4" outlet
- Chrome plated Dezincification Resistant (DZR) brass/stainless steel
- Operating pressures

Maximum: 150 psi (10 bar)
Minimum: 10 psi (. 7 bar)

- Integral inlet check valves and strainers
- ASSE 1017 and CSA B125 certified
- Shipping weight $18 \mathrm{lbs}(8.1 \mathrm{~kg})$
